

## *Join the Curtis Park Energy Stars!*

*Whether you are already conserving energy at home or want to conserve more, please join us!*

SCNA has entered into a partnership with SMUD to help reduce home energy use on a neighborhood-wide basis. Our goal is to demonstrate that Curtis Park is a model neighborhood for household energy conservation to help reduce global warming.

**As a Curtis Park Energy Star**, you pledge to try these simple steps:

- **Change 4 lights at home to compact fluorescents (CFLs).** This one small action is equal to removing two cars off the road for a month! Save \$194 over the life of the bulbs!
- **Lower thermostat 2 degrees in winter & raise it 2 degrees in summer.**
- **Clean refrigerator coils (behind and under) twice a year.**
- **Turn off lights when leaving a room.**
- **Unplug major electronic appliances when on vacation for more than a few days.**
- **Clean or replace filters on furnace and air conditioner.**
- **Only run the dishwasher or clothes washer when there's a full load.**
- **Energy conservation measure of my own choosing:** \_\_\_\_\_

For a closer look at your present energy use, visit [www.smud.org](http://www.smud.org) and take a home energy audit.
